

Log Home Pricing and Information

Every Atlantic Canada Log Home – White Cedar Log Home - is unique. The floor plan design, finishes and a variety of options you choose make your Log Home a “one of a kind” and play a very large role in determining what your final cost will be.

Because of this, an estimate cannot be given based on “Square Footage” alone ! If you are looking for a “Turn-Key” Log Home where you walk in and start living without doing any of the construction work yourself, expect to spend approximately between Canadian Dollar 135.00 to 160.00 per square foot. This does not include land, septic, well, utilities or excavation. It is very important to note that regardless of square footage, a Log Home with many corners, lots of windows or a choice between different roof designs will cost more than a “simple” four cornered Log Home. Remember to always find out from any Log Home company what the square footage listed in the price includes. As an example garages, decks or a balcony !

For more information about pricing, or to discuss your planned Log Home project with us please call 902 354- 3930 or e-mail us Loghomesales@eastlink.ca. A Atlantic Canada Log Home is specially tailored for you, not a factory reproduction or standard catalogue item.

Atlantic Canada Log Homes Inc. can customize any Log Home to reflect your tastes and preferences. We will work with you in developing your plan, helping you refine it for maximum efficiency.
